EXPERIENCE

2023 - Present

Full Stack Web Developer
JMBLISS IT SOLUTIONS , Indore

- As a seasoned Full Stack Developer at Jmbliss IT Solutions, I've been at the forefront of transformative web projects, specializing in WordPress, PrestaShop, and PHP. My role involved tackling issues, implementing fixes, and introducing advanced functionalities to enhance user experiences.
- From custom code development to server management, I ensured the seamless functioning of websites while thriving in high-pressure environments. Collaborating closely with cross-functional teams, I played a pivotal role in delivering visually stunning and technically robust solutions.

PROJECTS

NILO HEALTH | Wordpress Based Website For Mental Well Being Support Organization

- Formulated & executed robust project strategies aligned with organization objective.
- Helped creating wordpress website dynamically with the help of ACF Pro Plugin & PHP, creating custom modules for the websites to be used relentlessly by client.

DIYUN PLATFORM | Laravel , React Based Debate Platform

- Diyun facilitates independent debates , fostering intellectual discussions across diverse topics.
- Worked on Backend Part with laravel for the website creating APIs for data transfer and working functionalities in website.
- Implemented multiple CRUD operation performing APIs with the help of MVC structure and packages of laravel.
- Managed project as Lead where managed project time line and structuring project pipeline.
